

Manual of Clinical Cases in **ENT** and Head–Neck Surgery A Stepwise Approach

According to the latest CBME Guidelines | Competency Based Undergraduate Curriculum for the Indian Medical Graduate

makes a remarkable effort to guide the MBBS students in solving the clinical problems and puzzles in the diseases of ear, nose and throat. It covers history and clinical presentation with its diagnostic and management implications. Around 200 clinical cases are presented with lucid language which will definitely help the young and budding clinicians in the field of ear, nose, throat and head–neck surgery for easy diagnosis and treatment of the disease. Each clinical case is followed by different interesting questions and answers which will give confidence to the young clinicians. This book will serve to the practitioners, residents, undergraduate and postgraduate students. It will serve as a valuable handbook to the general practitioners (GPs) who have no formal training in ENT and head–neck surgery.

The Manual is basically aimed at MBBS students but MS and DNB students will also find it extremely useful. This is a must read book for appearing in the clinical examinations in ENT and head–neck surgery.

Preface

Every patient is unique and presents his/her distinct story. The same clinical problem may affect two different patients in different ways. So every patient create a puzzle in front of physician. This book in the field of otolaryngology and head and neck surgery is an unique creation for solving the jigsaw puzzle. This book presents numerous clinical cases and each case is followed by concise discussion regarding different issues related to clinical presentations and management in stepwise manner. While writing this book I took suggestions and constructive criticism from students, colleagues and friends. This book is a useful tool for undergraduates, postgraduates and general practitioners (GP) for dealing different clinical cases of ear, nose and throat and head–neck surgery. MS/MD/DNB aspirants and students preparing for USMLE and PLAB will also get benefit to get maximum score. I hope this book surely helps all levels of medical professionals such as undergraduate medical students, clinicians, residents and postgraduate aspirants with maximum benefit in the subject of ENT and head and neck surgery. Friends, I have tried my level best to provide useful clinical cases and stepwise discussion for helping them to get easy diagnosis. Teaching and learning go hand in hand. But ‘to err is human’ if there are questions where you disagree or have suggestions for the betterment of the book, kindly let me know.
