

# Stains and Staining Procedures in Microbiology

highlights the important aspects of various stains and staining procedures in microbiology and presents all the details to meet the requirements of postgraduate students in microbiology. In addition, it will be useful to postgraduates in Pathology, Biotechnology, Laboratory Medicine, Laboratory Technology and allied health sciences.

## Salient Features

- Gives exhaustive coverage of the staining procedures in microbiology, used commonly as well as rarely.
- Presents the text in bulleted form that helps the students in quick learning and revision.

**BS Nagoba** MSc, PhD (Medical Microbiology)

is Professor, Department of Microbiology, and Assistant Dean (Research & Development), Maharashtra Institute of Medical Sciences and Research (MIMSR) Medical College, Latur, Maharashtra. He has authored/edited 17 books, published 61 papers in prestigious international journals and 90 papers in national journals. He is the member of editorial boards of 9 International and 7 national journals, and reviewer for 52 international and 10 national journals. He is an eminent academician and delivered lectures at many national and international conferences. He was President (1999-2000) of Maharashtra Chapter of Indian Association of Medical Microbiologists.

He has been awarded several international, national and state level awards for his academic and research achievements, and adjudged the 'best teacher' by Maharashtra University of Health Sciences, Nashik. He is recipient of JWC Innovation Award (UK) for his work on wound infections.

**Megha Rastogi** MD (Microbiology)

has completed her postgraduation in microbiology from MIMSR Medical College, Latur, Maharashtra.

## Preface

This book has been exclusively written for the postgraduate students in microbiology, pathology and biotechnology to provide different staining procedures in microbiology under one roof.

An attempt has been made to cover the details of almost all staining procedures used for the demonstration of different groups of microorganisms. Sincere efforts have been made to offer a text that is accurate, concise, easy to understand, upto date and user friendly with relevant diagrams. A special care has been taken to give detailed information wherever necessary.

Though this book has been exclusively designed for the postgraduate students in microbiology, pathology and biotechnology, it will be of help to postgraduate students in parasitology, mycology, botany, zoology and other courses such as DMLT, pharmacy, etc. to understand the various stains and staining procedures in microbiology.

We hope this book will receive attention and appreciation from postgraduate students and teachers and will prove very useful for them to practice the different staining procedures routinely. Though efforts have been taken to cover all minute details, we do not claim perfection. We are open for discussion and welcome your constructive suggestions to make this book more perfect in subsequent editions.

**BS Nagoba**  
**Megha Rastogi**

## Acknowledgements

We are very happy to express our gratitude to Hon. Prof. Dr VD Karad, Executive President and Director General, MAEER's MIT, Pune, a dynamic personality and a renowned educationalist. He has always been a source of inspiration, guidance and help to us.

We are thankful to Shri RK Karad, Executive Director and Dr Mrs Sarita Mantri, Principal, MIMSR Medical College, Latur, for their support and guidance.

A very special thanks are due to Dr Nashira Shaikh, Associate Professor, Microbiology, Dr VM Medical College, Solapur, for mycology figures, Miss Pallavi Nagoba, Miss Ramani Nagoba and Mr JB Mule for drawing figures.

We are also thankful to Dr AP Pichare, Dr AR Lamture, Mr PB Kendre, Dr SM Dharne, Dr Milind Dawane, Dr SV Munde and other colleagues in the Dept of Microbiology, MIMSR Medical College, Latur, for their support and cooperation.

We would like to thank Senior Librarian Mr VN Kale, Miss Namita Surwase, Mr Dayanand Ghante, Mr Pandurang Jadhav, Mr Vinod Jogdand, Mr VP Mane, Mr Gaurav Mule, Mr Pangaonkar and Mr Gore for their sustained efforts in the preparation of manuscript.

We are also thankful to Mr SS Gutte, Mr Datta Shinde, Mr MJ Kaule and Mr SS Kadam for their timely help.

Finally we would like to thank CBS Publishers Pvt. Ltd, in particular Mr Javed and Mr Arjuna for their cooperation and sustained efforts in the publication of this book.

# Contents

<i>Preface</i>	v
1. Introduction to Stains	1
2. Types of Staining	13
3. Smear Preparation	17
4. Simple Staining (Monochrome Staining)	26
5. Negative Staining	31
6. Differential Staining I: Gram Staining	38
7. Differential Staining II: Ziehl-Neelsen Staining (Acid-fast Staining)	53
8. Differential Staining III: Romanowsky Stains	66
9. Impregnation Staining	76
10. Staining of Spores	80
11. Staining of Capsule	86
12. Staining of Granules	96
13. Staining of Flagella	108
14. Other Staining Methods	116
15. Fluorochrome Staining	125
16. Immunofluorescence Staining	132
17. Staining Procedures in Mycology	136
18. Staining Procedures in Parasitology	166
19. Staining Methods in Virology	185
<i>Bibliography</i>	197
<i>Index</i>	199
