Contents

Preface to the Fourth Edition *v*
Preface to the First Edition *vii*

1. Introduction to Feeding of Livestock: Importance of Scientific Feeding; Feeding Experiments **1**
Introduction *1*
Nutritional Experiments with Ruminant Animals *7*

2. Evaluation of Feeds by Digestion Experiments **10**
History of Digestion Experiments *10*
Measurement of Digestibility Coefficients *10*

3. Methods Adopted for Arriving at Nutrient Requirements of Livestock; Energy and Protein Requirements for Maintenance, Production and Reproduction, Requirement for Minerals and Vitamins **33**
Energy Requirements for Maintenance *33*
Fasting Catabolism *33*
Energy Metabolism of Fasting *33*
Requirements for Milk Production *42*

4. Feeding Standards: History, their Uses and Significance **48**
Definition and Expression of Feeding Standards *48*
History of Feeding Standards *48*
Merits and Demerits of Vartious Feeding Standards *55*
Net energy system *57*
Gut Microbes Unlock Nutrients from Feedstuffs *59*

5. Cattle and Buffalo Nutrition **61**
Evolution of Indian Requirements for Cattle and Buffaloes *61*
Energy and Protein Requirements for Maintenance *61*
Energy and Protein Requirements of Lactation *62*
Nutrient Requirements for Cattle and Buffalo for Milk Production *64*
Energy and Protein Requirements of Growing Cattle *66*
Energy and Protein Requirements of Growing Buffaloes *66*
Energy and Protein Requirements of Cattle and Buffaloes for Pregnancy *66*
Dairy Sector in India *94*
Feeding of Protein to Ruminants *104*
Feeding of Fat to Ruminants *111*
Feeding of High Yielding Dairy Animals—Good Transition Animal Management is Crucial *113*
Metabolic Disorders—Nutritional Solutions *119*
Level of Nutrition and Reproduction *148*
Effect of Nutrition of Dairy Animals on Milk Production and Composition *159*

6. Unconventional Feeds: Characteristics and their Utilisation in Livestock Feeding **178**
Necessity of NCFR 178

7. Small Ruminant Nutrition **193**
General Information on Goats and Sheep *193*
Nutrient Requirements and Feeding of Sheep *197*
Nutrient Requirements and Feeding of Goats for Meat and Milk Production *216*

8. Feed Intake in Ruminants: Prediction of DMI in Dairy Cow **242**
Control Centres in the Central Nervous System *242*
Voluntary Intake of Feed *242*
Control Mechanisms for the Feed Intake of Farm Animals *243*
Nutrient Metabolism and the Control of Feed Intake *248*
Key Constraints to Feed Intake of Healthy Animals *248*
Propionate Exhibits Hypophagic Effects *249*
Control Centres in the Central Nervous System *250*
Hepatic Oxidation Theory 250
Control of Hepatic Oxidation in Ruminants *251*
Conclusion *252*

9. Effect or Influence of Nutrition on Reproduction in Ruminants **254**
Nutrient Requirements for Reproduction—Assessing Nutrient Requirements *254*
Reproduction versus Growth *254*
Relationship between nutrition and Reproduction *255*
Effect of Nutrition on the Initiation of Reproductive Ability *256*

10. Rumen Modifiers for Today's Dairy Animals **262**
Rumen Modifiers for Today's Dairy Animals *262*
Consequences of Feeding High Starch-diet in Early Lactation *262*
Basics of Rumen Fermentation of Carbohydrates *263*
Modification of Rumen Fermentation: Two Approaches *263*
Additives to Manipulate Rumen Fermentation *263*
Conclusions *273*

11. Efficiency of Feed Conversion to Animal Products **277**

12. Development of Efficient Feeding System for Ruminant Animals **290**
Role of Rumen Microbes in the Digestion of Feed *290*
Efficient Utilisation of Existing Feed Resources—Precision Feeding Practices at Field Level—Benefits of Ration Balancing *294*
Food Security to Nutrition Security *297*
Precise Protein Nutrition for Dairy Cows *299*
Conclusions *303*
Multinutrient Blocks—Their Making, Feeding, Signs of Toxicity and Treatment *306*
Ready to Follow Practical Rations for Dairy Animals at Various Life Stages *309*
Densified Total Mixed Ration, Blocks and Pellets *311*

13. Transition Dairy Animal Nutrition and Reproduction **322**
The Effects of Transition Cow Nutrition on Subsequent Reproduction *322*
Reproduction and Nutrition *322*
Negative Energy Balance and Ovulatory Cycles *323*
Improving DMI during Early Lactation may Improve Reproductive Performance *323*
The Importance of Amino Acids *324*
Effect of Methionine on Embryo Development *326*

Appendices ***337***
Appendix I 337
Appendix II 342
