

# Contents

Foreword by Dr Anurag Mehta

vii

Preface

ix

<b>1. Biochemical Investigations in Clinical Medicine</b>	<b>1–21</b>	<b>3. Water and Electrolytes</b>	<b>68–113</b>
Introduction	1	Introduction	68
Diagnosis	1	Water Distribution	68
Prognosis	2	Properties of Water	69
Monitoring	2	Water Regulation	70
Screening	2	Movement of Water Among Compartments	71
Specimen Collection	2	Water and ECF Osmolality	71
The Patient	2	Antidiuretic Hormone	72
The Specimen	3	Water Depletion	72
Unacceptable Specimens	3	Water Excess	73
Sample Analysis and Reporting of Results	5	Electrolytes	73
Point-of-care Testing Policy and Accountability	6	Sodium	74
Bibliography	19	Sodium and Extracellular Fluid	76
		Atrial Natriuretic Peptide Hormones	76
<b>2. The Body Buffer Systems and Blood Gases</b>	<b>22–67</b>	Classification of Hyponatremia	79
Introduction	22	Hyponatremia by Osmolality	80
Acid-base Homeostasis	23	Pseudohyponatremia	81
Chemical Buffer Systems	24	Patient History	81
Phosphate Buffers	26	Symptoms and Signs	82
Role of Bone Buffering	27	Diagnosis	82
Respiratory Regulation	28	Management and Treatment of Hyponatremia	83
Acid-base Disorders	29	Etiology of Hypernatremia	85
Respiratory Acidosis	30	Gestational Diabetes Insipidus	87
Metabolic Acidosis	34	Classification of Hypernatremia	88
Lactic Acidosis	39	Patient History	88
Acidosis and Renal Failure	41	Symptoms and Signs	89
Drugs and Toxins	42	Laboratory Testing	90
Renal Causes	44	Measurement of Sodium	91
Gastrointestinal Tract Causes	46	Potassium	92
Other Causes	46	Potassium Depletion and Hypokalemia	93
Respiratory Alkalosis	52	Renal Losses	94
Metabolic Alkalosis	54	Drugs	94
Chloride Depletion	55	Enhanced Renal Chloride Excretion	95
Hydrochloric Acid Infusion	57	Potassium Excess and Hyperkalemia	97
Interpretation of Acid-base Data	59	Management and Treatment	99
Understanding the Oxyhemoglobin Dissociation Curve	59	Chloride	100
Dissociation Curve's Clinical Uses	61	Measurement of Chloride	104
Bibliography	65	Phosphate	105
		Magnesium	107
		Bicarbonate	107
		Bibliography	108

- 4. The Kidneys** **114–148**
- Introduction 114
  - Measurement of Glomerular Filtration Rate 116
  - Clearance 117
  - Plasma Urea 120
  - Assessment of Glomerular Integrity 121
  - Tests of Renal Tubular Function 121
  - Acute Kidney Injury 123
  - Determination of Cause 125
  - Chronic Kidney Disease 127
  - Anemia and Coagulation Disorders 130
  - Aluminum Toxicity 132
  - Nephrotic Syndrome 133
  - Laboratory Urine Testing 134
  - Defects of Urinary Concentration 138
  - Lysinuric Protein Intolerance 140
  - Types of Stones 141
  - Bibliography 143
- 5. The Liver** **149–188**
- Introduction 149
  - Liver Structure 149
  - Liver Function 151
  - Bilirubin Metabolism 152
  - Nonalcoholic Steatohepatitis 157
  - Alcoholic Liver Disease 158
  - Jaundice 161
  - Inborn Metabolic Disorders 164
  - Identification of the Cause 168
  - Acute Viral Hepatitis 170
  - Chronic Hepatitis 175
  - Liver Masses and Granulomas 178
  - Hematologic Cancers and the Liver 181
  - Liver Injury Caused by Drugs 182
  - Other Tests of Liver Function 185
  - Bibliography 186
- 6. The Gastrointestinal Tract** **189–231**
- Introduction 189
  - The Structure of GI 190
  - Gastrointestinal Disorders 191
  - Peptic Ulcer Disease 195
  - Helicobacter Pylori* Infection 196
  - The Small Intestine Diseases 198
  - Crohn's Disease 200
  - Fistulas 202
  - Surgery 203
  - Investigation of Intestinal Function 205
  - Whipple Disease 207
  - Pancreatic Disorders and their Investigation 207
  - Laboratory Tests 209
  - Pancreatic Cancer 212
  - Cystic Fibrosis 213
  - Intermediate Sweat Test Results 216
  - Respiratory Assessment 216
  - Newborn Screening 217
  - Antibiotics 218
  - Pancreatic Enzyme Replacement 219
  - Recombinant Human Growth Hormone (RHGH) 219
  - Bibliography 220
- 7. The Hypothalamus and Pituitary Gland** **232–246**
- Introduction 232
  - Anterior Pituitary Hormones 232
  - Gonadotrophins 233
  - Disorders of Anterior Pituitary Function 235
  - Anorexia Nervosa 236
  - Acromegaly 237
  - Pituitary Gigantism 238
  - Cushing's Disease 239
  - Measurement of Anterior Pituitary Hormones 240
  - Insulin Hypoglycemia Test 241
  - Disorders of Posterior Pituitary Gland 242
  - Psychogenic Polydipsia 244
  - Bibliography 244
- 8. The Adrenal Glands** **247–267**
- Introduction 247
  - Adrenal Steroid Hormone Biosynthesis 248
  - Disorders of the Adrenal Cortex 250
  - Adrenal Crisis 251
  - Adrenal Hyperfunction 253
  - Conn's Syndrome 257
  - Congenital Adrenal Hyperplasia 258
  - Disorders of the Adrenal Medulla 261
  - Pheochromocytoma 261
  - Imaging Tests to Localize Tumors 262
  - Bibliography 263
- 9. The Thyroid Gland** **268–288**
- Introduction 268
  - Synthesis of Thyroid Hormones 269
  - Hyperthyroidism 271
  - Thyroid Storm 273
  - Hypothyroidism 275
  - Subclinical Hypothyroidism 277
  - Hashimoto Thyroiditis 277
  - Euthyroid Sick Syndrome 278
  - Silent Lymphocytic Thyroiditis 278
  - Subacute Thyroiditis 279
  - Simple Nontoxic Goiter (Euthyroid Goiter) 279
  - Thyroid Cancers 280
  - Radiation-induced Thyroid Cancer 281
  - Screening for Thyroid Disease 284
  - Bibliography 284

- 10. The Gonads** **289–325**
- Androgens and Testicular Function 289
  - Estrogens and Ovarian Function 291
  - Progesterone 292
  - Biosynthesis of Estrogens and Progesterone 292
  - Transport of Hormones in the Blood 294
  - Disorders of Male Gonadal Function 294
  - Gynecomastia 296
  - Disorders of Female Gonadal Function 298
  - Anovulatory Amenorrhea 299
  - Dysfunctional Uterine Bleeding 303
  - Polycystic Ovary Syndrome 305
  - Primary Ovarian Insufficiency 306
  - Hirsutism and Virilism 308
  - Gonadotropin and Inhibin Measurements 311
  - Measurement of Unbound Testosterone Levels 312
  - Ovulatory Dysfunction 314
  - Tubal Dysfunction and Pelvic Lesions 315
  - Assisted Pregnancy 316
  - Specific Hormonal Changes 316
  - Maternal Monitoring 319
  - Metabolic Effects of Oral Contraceptives 320
  - Bibliography 320
- 11. Disorders of Carbohydrate Metabolism** **326–355**
- Introduction 326
  - Insulin 326
  - Proinsulin 328
  - Insulin-like Growth Factors 331
  - Disorders of Carbohydrate Metabolism 333
  - Complications 335
  - Gestational Diabetes 337
  - Metabolic Complications of Diabetes 339
  - Nonketotic Hyperglycemia 340
  - Hypoglycemia in Diabetic Patients 342
  - Postprandial Hypoglycemia 343
  - Hepatic and Renal Disease 345
  - Hypoglycemia in Childhood 345
  - Measurement of Glucose Concentration 346
  - Specimen Collection and Storage 346
  - Glycosuria 347
  - Specimen Collection and Storage 347
  - Glycogen Storage Disorders 348
  - Mucopolysaccharidoses 351
  - Bibliography 352
- 12. Disorders of Bone and Mineral Metabolism** **356–388**
- Introduction 356
  - Cell Signaling in Bone 357
  - Measurement of Calcium 360
  - Specimen Requirements 360
  - Measurement of Parathyroid Hormone 362
  - Measurement of Vitamin D Metabolites 364
  - Calcium and Phosphate Homeostasis 365
  - Magnesium 368
  - Paget Disease of Bone 371
  - Osteomalacia and Rickets 372
  - Renal Osteodystrophy 373
  - Bibliography 382
- 13. Plasma Proteins** **389–429**
- Introduction 389
  - Physical Properties of Proteins 390
  - Plasma Protein Concentrations 390
  - Major Plasma Proteins 391
  - Specific Plasma Proteins 393
  - Increased Plasma Concentrations 393
  - Clinical Significance of Albumin 395
  - Laboratory Testing 396
  - $\alpha$ 1 Acid Glycoprotein 397
  - $\alpha$ 1 Antitrypsin 398
  - $\alpha$ 2 Macroglobulin 400
  - Ceruloplasmin 400
  - Haptoglobin 402
  - Transferrin 404
  - $\beta$ 2 Microglobulin 405
  - C-Reactive Protein 405
  - Complement Proteins 406
  - Cytokines 410
  - Immunoglobulins 410
  - Free Immunoglobulin Light Chains 413
  - Polyclonal Hyperimmunoglobulinemia 415
  - Macroglobulinemia 419
  - Heavy Chain Diseases 420
  - Specimen Collection and Storage for
    - Immunoassay 423
  - Immunofixation Electrophoresis 424
  - Mass Spectrometry 424
  - Bibliography 425
- 14. Serum Enzymes** **430–454**
- Introduction 430
  - Diagnostic Enzymology 430
  - Muscle Enzymes 432
  - Creatine Kinase 432
  - Methods for Determination of Creatine
    - Kinase Activity 434
  - Aldolase 435
  - Methods for Measurement of Aldolase Activity 435
  - Liver Enzymes 435
  - Alkaline Phosphatase 435
  - Methods for Determination of Alkaline
    - Phosphatase Activity 436
  - Aminotransferases 438
  - Methods for Measurement of Transaminase
    - Activity 440
  - Glutamate Dehydrogenase 441
  - Methods for Determination of Glutamate 441

- $\gamma$ -Glutamyl Transferase 442
  - 5'-Nucleotidase 443
  - Pancreatic Enzymes 444
  - Amylase 444
  - Lipase 446
  - Methods for Measuring Lipase Activity 447
  - Trypsin 448
  - Methods for Determination of Trypsin 449
  - Alkaline Phosphatase (Bone Isoform) 449
  - Methods for Determination of Lactate 451
  - Enzyme Activity 451
  - Disadvantages of Enzyme Assays 451
  - Bibliography 452
- 15. Lipids, Lipoproteins and Apolipoproteins 455–486**
- Introduction 455
  - Cholesterol 455
  - Cholesterol Synthesis 456
  - Cholesterol Catabolism 458
  - Fatty Acids 459
  - Glycerol Esters (Acyl Glycerols) 461
  - Lipoproteins 462
  - Apolipoproteins 464
  - Exogenous Pathway 466
  - Endogenous Pathway 468
  - Reverse Cholesterol Transfer Pathway 469
  - Lipid Disorders 469
  - Dyslipidemia (Hyperlipidemia) 469
  - Primary Causes 470
  - Secondary Causes 472
  - Elevated LDL Cholesterol in Children 476
  - Hypolipidemia 478
  - Hypobetalipoproteinemia 479
  - Elevated High-density Lipoprotein Low-density Lipoprotein Level 479
  - Bibliography 482
- 16. Therapeutic Drug Monitoring 487–528**
- Introduction 487
  - Routes of Drug Administration 487
  - Drug Metabolism 488
  - Drug Excretion 489
  - Anti-epileptic Drugs 489
  - Carbamazepine 491
  - Ethosuximide 491
  - Phenobarbital 492
  - Primidone 492
  - Phenytoin 493
  - Valproic Acid 493
  - Contemporary Anti-epileptics 494
  - Epilepsy 497
  - Generalized Seizures 498
  - Physical Examination 501
  - Antimicrobial Agents 502
  - Aminoglycosides 503
  - Glycopeptides 503
  - Tuberculosis Therapy 503
  - Other Antibiotics 504
  - Protease Inhibitors 506
  - Enzyme-multiplied Immunoassay 510
  - Everolimus 514
  - Ethanol and Alcohol Testing 519
  - Metabolism and Excretion of Ethanol 519
  - Automated Immunoassay Methods 521
  - Chromatography Methods 522
  - Heavy Metal Toxicity 522
  - Mercury Exposure 523
  - Bibliography 524
- 17. Tumor Markers 529–550**
- Introduction 529
  - Enzymes 529
  - Alkaline Phosphatase 530
  - Neuron-specific Enolase 531
  - Kallikreins 531
  - Prostate-specific Antigen 532
  - The Urokinase-plasminogen Activator System 534
  - Hormones 534
  - Oncofetal Antigens 537
  - Carcinoembryonic Antigen 538
  - Carbohydrate Markers 539
  - Proteins 543
  - Bladder Cancer Markers 543
  - Receptors and Other Markers 544
  - Bibliography 545
- 18. Vitamins 551–580**
- Introduction 551
  - Fat-soluble Vitamins 553
  - Vitamin A Deficiency 554
  - Vitamin E 555
  - Vitamin D 557
  - Vitamin K 560
  - Water Soluble Vitamins 562
  - Riboflavin 563
  - Riboflavin Deficiency 564
  - Vitamin B6 564
  - Niacin 565
  - Folic Acid 567
  - Vitamin B12 568
  - Biotin 572
  - Pantothenic Acid 572
  - Ascorbic Acid 572
  - Bibliography 574
- 19. Trace and Toxic Elements 581–600**
- Introduction 581
  - Trace Elements Homeostasis 581
  - Copper 582

- Absorption, Transport, and Excretion 582  
Inherited Copper Deficiency 582  
Wilson Disease 583  
Selenium 586  
Chromium 587  
Manganese 587  
Iodine 588  
Molybdenum 589  
Fluoride 589  
Aluminum 590  
Arsenic 591  
Cadmium 592  
Lead 592  
Mercury 593  
Inductively Coupled Plasma Mass Spectrometry 596  
Interferences 597  
Elemental Speciation 598  
Bibliography 599
- 20. Toxicology of Specific Agents 601–625**
- Introduction 601  
Agents that Cause Cellular Hypoxia 602  
Carbon Monoxide 602  
Analytical Methods 602  
Cyanide 603  
Methemoglobin-forming Agents 604  
Alcohols of Toxicologic Interest 605  
Ethanol 605  
Methanol 606  
Isopropanol and Acetone 607  
Ethylene Glycol 607  
Estimation of Blood Alcohol 608  
Ethyl Glucuronide 609  
Analysis of Volatile Alcohols (Methanol, Isopropanol, and Acetone) 609  
Pharmacologic Response 611  
Morphine 614  
Codeine 615  
Semisynthetic Opiates 615  
Heroin 615  
Hydrocodone 615  
Hydromorphone 615  
Oxycodone 615  
Oxymorphone 616  
Fully Synthetic Opioids 616  
Fentanyl 616  
Meperidine 616  
Methadone 616  
Propoxyphene 616  
Tramadol 616  
Opioid Antagonists and Mixed Agonist/Antagonists 617  
Buprenorphine 617  
Naloxone 617  
Sample Preparation and Extraction 618
- Drugs of Abuse Related to the Sympathomimetic Syndrome 619  
Cocaine 619  
Pharmacologic Response 620  
Bibliography 622
- 21. The Porphyrrias and Other Disorders of Porphyrin Metabolism 626–649**
- Introduction 626  
Chemistry of Porphyrins 626  
Porphyrin Synthesis 627  
Porphyria Disorders 627  
Acute Porphyrias 630  
Cutaneous Porphyrias 636  
Pseudoporphyria 637  
Erythropoietic Protoporphyria and X-linked Protoporphyria 639  
Laboratory Diagnosis of Porphyria 640  
Methods for Porphyrin Precursors 641  
Analysis of Porphyrins in Urine and Feces 642  
HPLC Fractionation of Porphyrins in Urine and Feces 643  
Methods for Blood Porphyrins 643  
Analysis of Plasma Porphyrins 644  
Bibliography 645
- 22. Inherited Disorders of Metabolism and Newborn Screening 650–695**
- Introduction 650  
Clinical Presentation 650  
History and Physical Examination 650  
Amino Acid and Organic Acid Metabolism Disorders 653  
Maple Syrup Urine Disease 658  
Propionic Acidemia 659  
Methylmalonic Acidemia 659  
Methionine Metabolism Disorders 659  
Classic Homocystinuria 660  
Other Forms of Homocystinuria 661  
Cystathioninuria 661  
Sulfite Oxidase Deficiency 661  
Phenylketonuria 661  
Transient Tyrosinemia of the Newborn 662  
Alkaptonuria 664  
Oculocutaneous Albinism 665  
Urea Cycle Disorders 665  
Carbohydrate Metabolism Disorders 672  
Galactosemia 672  
Glycogen Storage Diseases 673  
Pyruvate Metabolism Disorders 675  
Fatty Acid and Glycerol Metabolism Disorders 676  
Beta-oxidation Cycle Disorders 677  
Glutaric Acidemia Type II 680  
Glycerol Metabolism Disorders 680

- Lysosomal Storage Disorders 681  
 Mucopolysaccharidosis 681  
 Sphingolipidoses 683  
 Cholesteryl Ester Storage Disease 686  
 Fabry Disease 686  
 Gaucher Disease 686  
 Krabbe Disease 687  
 Metachromatic Leukodystrophy 687  
 Purine and Pyrimidine Metabolism Disorders 687  
 Adenosine Deaminase Deficiency 689  
 Purine Nucleoside Phosphorylase Deficiency 690  
 Uridine Monophosphate Synthase Deficiency (Hereditary Orotic Aciduria) 691  
 Plasma Acylcarnitine Profile 693  
 Bibliography 693
- 23. Analytic Techniques and Instrumentation 696–727**  
 Introduction 696  
 Spectrophotometry 696  
 Beer's Law 697  
 Spectrophotometric Instruments 698  
 Components of a Spectrophotometer 699  
 Photodetectors 700  
 Atomic Absorption Spectrophotometer 701  
 Flame Photometry 703  
 Basic Instrumentation 703  
 Advantages and Disadvantages of Fluorometry 704  
 Chemiluminescence 705  
 Turbidity and Nephelometry 705  
 Galvanic and Electrolytic Cells 706  
 Indicator Electrode 707  
 Liquid Junctions 707  
 Gas-sensing Electrodes 709  
 Enzyme Electrodes 709  
 Osmometry 713  
 Automation of Specimen Preparation 713  
 Mobile Robots 714  
 Sample Introduction and Internal Transport 715  
 Reagent Handling and Storage 716  
 Barcoding 717  
 Modes of Separation 718  
 Steric Exclusion 718  
 Chromatographic Procedures 719  
 High-performance Liquid Chromatography 720  
 Sample Injectors 721  
 Gas Chromatography 722  
 Electron Ionization 723  
 Atmospheric Pressure Chemical Ionization 724  
 Tandem Mass Spectrometry 725  
 High-resolution Mass Spectroscopy 726  
 Bibliography 727
- 24. Point-of-Care Testing 728–742**  
 Introduction 728  
 Laboratory Regulations 729  
 Implementation 730  
 Quality Management 732  
 Informatics and POCT 734  
 Equipment Procurement and Evaluation 736  
 Training and Certification of Operators 736  
 Maintenance and Inventory Control 737  
 Documentation 738  
 Bibliography 739
- 25. Clinical Chemistry and the Geriatric Patient 743–772**  
 Introduction 743  
 Aging 743  
 General Physiologic Changes with Aging 744  
 Evaluation of the Elderly Patient 745  
 Polypharmacy 746  
 Physical Examination 750  
 Head and Neck 751  
 Cranial Nerves 754  
 Reflexes 755  
 Comprehensive Geriatric Assessment 756  
 Increased Hormone Level 757  
 Decreased Hormone Level 758  
 Establishing Reference Intervals for the Elderly 758  
 Hepatic Metabolism 759  
 Pharmacodynamics in the Elderly 761  
 Drug-related Problems in the Elderly 762  
 Reasons for Drug-related Problems 762  
 Drug-disease Interactions 762  
 Drug Categories of Concern in the Elderly 764  
 Anticoagulants 767  
 Anxiolytics and Hypnotics 769  
 Bibliography 770
- 26. Lean Six Sigma Methodology for Quality Improvement in the Clinical Chemistry Laboratory 773–782**  
 Introduction 773  
 Lean Six Sigma 773  
 Adoption and Implementation of Lean Six Sigma 773  
 Senior Roles 774  
 Process Improvement 775  
 Measurements of Success Using Lean and Six Sigma 776  
 Practical Application of Six Sigma Metrics 779  
 Bibliography 780
- Appendix A to C 783–817*  
*Index 818–824*
