

Contents

Preface

vii

Section A: Carbohydrates and their Metabolism

1. Carbohydrate Chemistry	1
2. Glucose Oxidation	8
3. Gluconeogenesis	15
4. Glycogen Metabolism	20
5. Galactose Metabolism	24
6. Fructose Metabolism	26
7. HMP Shunt Pathway	28
8. Uronic Acid Pathway	30

Section B: Lipid Metabolism

9. Fatty Acid Synthesis	34
10. Fatty Acid Oxidation	38
11. Ketone Body Metabolism	43
12. Cholesterol and Bile Acid Synthesis	45
13. Lipoprotein Metabolism (Chylomicron, VLDL, LDL and HDL Metabolism)	48

Section C: Amino Acids and their Metabolism

14. Urea Cycle (Krebs-Henseleit Cycle or Ornithine Cycle)	54
15. Simple, Hydroxyl & Branched chain Amino Acid (Glycine, Alanine, Serine, Threonine, Leucine, Valine and Isoleucine)	57
16. Acidic and Basic Amino Acids (Aspartic Acid, Glutamic Acid, Arginine, Lysine and Histidine)	61
17. Sulphur-containing Amino Acid (Methionine, Cysteine and Homocysteine)	65
18. One-Carbon Metabolism	67
19. Aromatic Amino Acid (Phenylalanine, Tyrosine and Tryptophan)	69

Section D: Electron Transport Chain

20. Electron Transport Chain and Oxidative Phosphorylation	77
--	----

Section E: Nucleotide Chemistry and Metabolism

21. Nucleotide Chemistry and its Clinical Aspects	80
---	----

Section F: DNA Replication, Transcription, Translation and Gene Regulation

22. Nucleic Acid (DNA and RNA) Structure	87
23. DNA Replication in Prokaryotes and Eukaryotes	92
24. DNA Repair Process	96
25. Transcription and Post-Transcriptional Modification	99
26. Translation	105
27. Lac Operon Model	107

Section G: Genetic Technologies

28. Recombinant DNA Technology	108
29. Blotting Techniques	111
30. Polymerase Chain Reaction	113
31. Restriction Fragment Length Polymorphism	115

Section H: Heme

32. Heme Metabolism	117
---------------------	-----

Section I: Enzyme

33. Enzyme: General Aspects	120
34. Clinical Enzymology	128

Section J: Miscellaneous

35. Nutrition	130
36. Vitamins	134
37. Cell and its Organelles	152
38. Plasma Membrane	157
