

Contents

1. GENERAL MICROBIOLOGY	1
■ History of Microbiology	2
■ Morphology and Physiology of Bacteria	4
■ Taxonomy and Classification of Bacteria	16
■ Sterilization and Disinfection.....	16
■ Culture Media	24
■ Culture Methods.....	26
■ Biochemical Tests for Identification of Bacteria	27
■ Bacterial Genetics.....	29
2. IMMUNOLOGY	35
■ Infection.....	36
■ Immunity	39
■ Antigen	42
■ Immunoglobulins–Antibodies	45
■ Antigen-Antibody Reaction.....	50
■ Complement System	55
■ Structure and Functions of Immune System	58
■ The Immune Response	65
■ Hypersensitivity.....	72
■ Autoimmunity.....	78
■ Immunodeficiency Diseases	81
■ Transplantation and Tumor Immunity.....	87
3. SYSTEMATIC BACTERIOLOGY	91
■ Staphylococcus.....	92
■ Streptococcus	99
■ Pneumococcus (Streptococcus Pneumoniae)	108
■ Neisseria.....	112
■ Corynebacterium.....	119
■ Bacillus	125
■ Clostridium.....	131
■ Nonsporing Anaerobes	141
■ Enterobacteriaceae.....	143

■ Shigella	152
■ Salmonella—Arizona Group	156
■ Pseudomonas	161
■ Vibrios, Campylobacter, Helicobacter and Associated Bacteria	167
■ Haemophilus, Bordetella, Brucella and Francisella	176
■ Yersinia and Pasteurella	185
■ Mycobacteria	189
■ Spirochete	202
■ Actinomycetes	215
■ Mycoplasma and Cellwall Defective Bacteria	219
■ Legionella, Bartonella, Unusual Bacterial Pathogen	223
■ Rickettsiae	231
■ Chlamydiae	237
■ HACEK Group and Miscellaneous Bacterias	242

4. VIROLOGY 249

■ General Properties of Viruses	250
■ Virus Host Interactions—Viral Infections	258
■ Parvo Viruses	262
■ Adeno Virus	265
■ Herpes Viruses	266
■ Pox Viruses	276
■ Picorna Virus	278
■ Orthomyxoviruses	285
■ Paramyxoviruses	290
■ Arboviruses	296
■ Rhabdovirus	306
■ Retroviruses	311
■ Hepatitis	322
■ Bacteriophage	334
■ Oncogenes and Oncogenic Viruses	335
■ Miscellaneous Viruses	337

5. MEDICAL MYCOLOGY 347

■ Introduction to Mycology	348
■ Superficial Mycoses	354
■ Surface Mycoses	354
■ Cutaneous Mycoses	356
■ Deep Mycoses	360
■ Systemic Mycoses	369
■ Opportunistic Mycoses	378
■ Pneumocystosis	389

6. APPLIED MICROBIOLOGY	399
■ Normal Microbial Flora of Human Body.....	400
■ Urinary Tract infection.....	402
■ Intra-Abdominal Infections.....	405
■ Diarrheal Diseases.....	408
■ Meningitis.....	412
■ Septicemia and Bacteremia.....	414
■ Health Care Associated Infections.....	422
■ Biomedical Waste Management.....	424
■ Zoonotic Diseases.....	429
■ Diagnostic Medical Microbiology.....	430
7. PARASITOLOGY	441
■ General Parasitology.....	442
■ Amoeba.....	449
■ Free Living Amoeba.....	453
■ Intestinal, Oral and Genital Flagellates.....	461
■ Balantidium Coli.....	465
■ Blood and Tissue Flagellates.....	466
■ Malaria.....	472
■ Intestinal Coccidian Parasites.....	479
■ Sarcocystis.....	484
■ Helminthology.....	489
■ Diphylobothrium Latum.....	492
■ Spirometra.....	492
■ Teania.....	493
■ Echinococcosis.....	498
■ Hymenolepis Nana and H. diminuta.....	502
■ Trematodes (Flukes).....	504
■ Nematodes.....	516
■ Enterobius Vermicularis.....	519
■ Hookworm.....	520
■ Strongyloidiasis.....	524
■ Larva Migrans.....	527
■ Ascaris Lumbricoides.....	528
■ Trichuris Trichura.....	530
■ Filariasis.....	531
■ Dracunculus Medinensis.....	539
■ Diagnostic Procedures.....	543
IMAGE-BASED QUESTIONS	555
