

Textbook of **Pharmacognosy and Phytochemistry I**

is aimed at the semester IV students of BPharmacy, and is structured as per the latest syllabus recommended by Pharmacy Council of India (PCI) for Bachelor of Pharmacy course effective throughout India from the academic year 2016-17.

The textbook focuses on the •fundamentals of pharmacognosy, •classification of crude drugs, •their identification, •evaluation, •marine drugs, •tissue culture techniques, •phytochemicals present in the drugs and their •medicinal properties.

The textbook will help the undergraduate and postgraduate students of pharmacognosy to understand:

- techniques in cultivation and production of crude drugs
- crude drugs, their uses and chemical nature
- evaluation technique for herbal drugs
- microscopic and morphological evaluation of crude drugs.

This textbook will also serve as a valuable information source for MPharm students as well as undergraduate/postgraduate students of courses in alternative systems of medicine.

A N Kalia MPharm, PhD is former Professor and Head, Department of Pharmaceutical Sciences, Maharshi Dayanand University, Rohtak, Haryana; Director, Herbal Drugs Research, ISF College of Pharmacy, Moga, Punjab; and Director-Principal, Sri Sai College of Pharmacy, Badhani, Pathankot, Punjab. He has four decades of experience of teaching pharmacognosy not only to undergraduate students but also postgraduate students of pharmacognosy and allied subjects of pharmaceutical sciences.

During his academic and research career, Dr Kalia has supervised about 65 MPharm theses and 7 PhD students, conducted/coordinated UGC/AICTE sponsored research projects, and organized AICTE/DST sponsored scientific conventions. He has to his credit over 75 publications in international and national journals of repute. He is also reviewer of many national and international journals.

He is Vice-President of Society of Pharmacognosy (India), North Region. He has received "Lifetime Achievement Award 2016" from Society of Pharmacognosy for his contribution to science and excellence in teaching and research in pharmacognosy and phytochemistry. He has served as an expert member of AICTE and PCI inspection teams as well as NBA committees, as a member of academic council of university body, and as examiner of a number of universities.

He is author of very popular *Textbook of Industrial Pharmacognosy* published by CBSPD.

Preface

The syllabus of this book is newly introduced course for B Pharmacy students of Semester IV, under the revised syllabus recommended by Pharmacy Council of India (PCI), New Delhi, under Bachelor of Pharmacy Course Regulation 2014. It is effective throughout India from the academic year 2016–17.

The Council has recommended the division of the course contents into five units with the certain scope and objective:

Scope: The subject involves the fundamentals of pharmacognosy like, classification of crude drugs, their identification and evaluation, phytochemicals present in them and their medical properties.

Objective: Upon completion of the course. The student shall be able to: (i) Know the techniques in cultivation and production of crude drugs, (ii) Know the crude drugs their uses and chemical nature, (iii) Know the evaluation techniques for herbal drugs, and (iv) Carry-out the microscopic and morphological evaluation of crude drugs.

With an extensive experience in the field of teaching in pharmaceutical sciences at different levels such as B Pharm, M Pharm and PhD in the subject of pharmacognosy and after attaining the popularity from wide acceptance of my previous book *Textbook of Industrial Pharmacognosy* by the students and teachers community aimed to write this *Textbook of Pharmacognosy and Phytochemistry I* for B Pharm students of semester IV.

Therefore this book is divided into five units:

Unit I provides a general introduction to pharmacognosy to cover the objective, the text is discussed under subheading (a) Definition, history scope and development. (b) Organised and unorganised drugs with examples as per recommendation; classification of drugs and quality control of drugs of natural origin with respect to adulteration evaluation by physical, chemical, microscopic and biological methods and properties.

Unit II provides the knowledge of cultivation, collection, processing and storage of drugs of natural origin as well as conservation of medicinal plants.

Unit III explains the development and applications of plant tissue culture in pharmacognosy as well the edible vaccines.

Unit IV discusses the role of pharmacognosy in various system of medicines (Ayurveda, Sidha, Unani and Homeopathy) and also the introduction of secondary metabolites of plants useful in medicines.

Unit V provides the knowledge about the biological source, chemical nature and uses of drugs of natural origin with examples such as fibers, hallucinogens, teratogens, natural allergens and primary metabolites such as carbohydrates, proteins and enzymes; lipids (waxes fats and fixed oils) and the novel medicinal agents from marine source.

The information cited in this book are procured from published books, scientific periodicals, websites of government agencies like AYUSH, WHO; internet and current science. To acknowledge for thanks all the information sources have been given as bibliography. My aim of compiling the information in the form of textbook is for easy access of students at one place to achieve the objective of Pharmacy Council of India's recommendation for semester IV.

I am highly grateful to my daughters, Dr Aparna and Dr Vandana and son-in-law's Dr Ajay and Dr Mahendra for their generous help in the preparation of this book.

I would like to thank CBS Publishers & Distributors Pvt. Ltd., New Delhi for their cooperation in the publication of this book.

I will be grateful to have any criticism and suggestion from readers for further improvement of the book.

ANKalia

Contents

Preface

vii

UNIT I

Introduction to Pharmacognosy Definition, History, Scope and Development in Pharmacognosy

1. Introduction to Pharmacognosy	3
---	----------

Scope and Development	4
Sources of Drugs	5
Organised and Unorganised Drugs	10

2. Classification of Drugs	18
-----------------------------------	-----------

Alphabetical	18
Morphological Basis of Classification	18
Taxonomical	19
Pharmacological	22
Chemotaxonomy	23
Serotaxonomy	26

3. Quality Control of Drugs of Natural Origin	28
--	-----------

Adulteration of Drugs of Natural Origin	28
Drugs Evaluation	30
Organoleptic Properties (Evaluation)	30
Morphological Characters of Underground Organs	34
Microscopic Evaluations	41
Physical and Chemical Evaluation of Crude Drugs	43
Chemical Methods of Evaluation	49
Biological Evaluation	51
Quantitative Microscopy	63

UNIT II

Cultivation and Conservation of Medicinal Plants

4. Cultivation of Medicinal Plants	75
---	-----------

Processing, Storage, Collection of Drugs from Natural Origin	76
Factors Affecting the Quality of Drugs	76

Cultivation of Medicinal Plants	78
Factors Effecting the Cultivation of Medicinal Plants	81
Mutation	83
Polypliody	83
Hybridisation	84
Plant Growth Regulators	84
Conservation of Medicinal Plants	91

UNIT III Plant Tissue Culture

5. Plant Tissue Culture and Edible Vaccines 97

Advantages of Tissue Culture Technique Over the Conventional Cultivation Techniques	97
Historical Development of Plant Tissue Culture	98
Culture Media	106
Types of Plant Tissue Cultures; Their Establishment and Maintenance	112
Establishment and Maintenance of Various Cultures	115
Applications of Tissue Culture in Pharmacognosy	120
Edible Vaccines	128

UNIT IV Pharmacognosy in Various Systems of Medicines

6. Role of Pharmacognosy in Allopathy and Traditional Systems of Medicines 133

Ayurveda	134
Modern System or Allopathy	136
Unani System of Medicines	137
Homeopathy System of Medicines	137
Siddha System of Medicines	138
Materia Medica in Siddha	139
Traditional Chinese Medicines	140

7. Introduction to Secondary Metabolites 141

Alkaloids	141
Glycosides	146
Flavonoid Glycosides	152
Anthraquinone Glycosides	156
Essential Oils (Volatile Oil)	158
Tannins	161

UNIT V

Study of Biological Sources, Chemical Nature and Uses of Plant Products

8. Plant Products: Fibres—Cotton, Jute, Hemp 167

Cotton	167
Jute	168
Hemp	169
Flax fibre	169

Hallucinogens	169
Teratogens	171
Allergenic Extracts	179
9. Primary Metabolites	183
Introduction	183
Carbohydrates	183
Acacia Gum	184
Tragacanth	186
Agar	187
Honey	188
Proteins and Enzymes	189
Gelatin	189
Casein	190
Proteolytic Enzymes	191
Lipids (Fixed Oil, Fats and Waxes)	195
10. Marine Pharmacognosy (Novel Medicinal Agents from Marine Source)	204
Introduction	204
Marine Organism as Potential Source of Drugs	205
Conotoxin	205
Antimicrobial Compounds	206
Antiviral Compounds	209
Cytotoxic Compounds	209
Cardiovascular and Neurophysiological Agents	211
Anti-inflammatory Agents	212
Anthelmintic	212
Anticoagulants	212
Prostaglandins	213
<i>Index</i>	215
