## Preface to the Second Edition

With the process of digitization in the country progressing and to keep more transparency, more and more institutions and examining bodies are opting for MCQs as mode of recruitment.

Keeping in view the above and more demand of MCQs by the readers, it was decided to update the book with large number of important MCQs so as to benefit the students. I am sure our sincere efforts will be helpful to the aspirants.

## Preface to the First Edition

It is an overwhelming situation/occasion when our young students want to take up as a career in the professional institution to do M.B.B.S. or technologist course in Radiology like B.Sc. Medical Imaging technologist or M.Sc. Medical Imaging Technologist course. There are a lot of mixed moments of joy, euphoria and depression during this period of preparation because of change of the perception from theoretical knowledge to a competition. The popularity of the Radiology in this imaging era and the pivotal role played by the technologists, the book has been prepared with most expected MCQs covering almost all from basic to the latest in the imaging including artifacts. The pattern of the questions vary from simple, straight forward to tough ones, which offer a good mental exercise to all. The standard Textbook of Radiology has been used to prepare these MCQs and the answer appeared are standard and universally accepted. The book is one of its kind as it offers complete preparation of the subject aiming to get entrance examination for technologist, M.B.B.S. and F.R.C.R. examination.
