

# Physics

for Paramedical and Allied Health Science Courses

## Salient features of the book

- This book provides a comprehensive coverage to physical concepts in health sciences explained in brief in a simple language with suitable illustrations.
- The book includes more than 180 diagrams, specially drawn to lucidly explain the basic concepts through two-color rendition.
- All the chapters cover the rudimentary concepts of physics in health sciences.
- An ideal textbook of physics designed to meet the requirements of the undergraduate students of courses in allied health sciences, medical laboratory technology, physiotherapy, operation theatre technology, physical rehabilitation, optometry, biomedical instrumentation, audiometry, accidental and trauma technology, occupational therapy, nursing, anaesthesia technology, respiratory therapy, radiography and imaging technology.

**G Purushothaman** MSc, MPhil, PhD is currently Reader, Vivekanandha Dental College for Women and Vivekanandha College of Allied Health Sciences, Tiruchengode, Tamil Nadu. He received his MSc in biophysics from Centre of Advanced Study in Crystallography and Biophysics, University of Madras, Chennai, and PhD in medical physics from the MAHER University, Chennai. He has taught at Meenakshi Medical College, Kanchipuram, Tamil Nadu. He has worked in the field of radiation physics, radiation stress, ECG studies, small molecule structure determination and docking studies and haematological experiments in physiology. He has 15 years of teaching experience in teaching radiation physics and instrumentation and medical physiology to medical, dental, nursing and allied health science students. He has numerous research publications and serves as an examiner for undergraduate students from Dr MGR Medical University.

**S Qairunnisa** MSc, PhD is currently Assistant Professor, Department of Physiology, Sri Venkateswara Medical College (SVMC), Tirupati. She received her MSc in medical physiology from Sri Venkateswara Institute of Medical Sciences (SVIMS), Tirupati, and PhD in medical physiology from the MAHER University, Chennai. She has a vast experience of teaching physiology to undergraduate and postgraduate medical, dental and nursing students. She has research experience in the areas of stress, especially restrain, heat and cold stress, nerve conduction studies, ECG studies and cardiovascular response to yoga training. She has to her credit many research papers published in indexed journals, and serves as an examiner for undergraduate students in many Indian universities.

Physics for Paramedical and Allied Health Science Courses

Purushothaman Qairunnisa

# Physics

for Paramedical and Allied Health Science Courses

## Including Courses in

- Medical Laboratory Technology • Physiotherapy • Optometry
- Operation Theatre Technology • Physical Rehabilitation
- Biomedical Instrumentation • Audiometry • Nursing
- Accident and Trauma Technology • Respiratory Therapy
- Occupational Therapy • Anaesthesia Technology
- Radiography and Imaging Technology

**G Purushothaman**  
**S Qairunnisa**

CBSPD Dedicated to Education

*Preface*

*vii*

## **1. BASIC CONCEPTS**

**1–13**

- 1.1 What is Physics? 1
- 1.2 Measuring Things 1
- 1.3 Standards of Length, Mass and Time 2
- 1.4 SI Base Units and the Radian and Steradian 3
- 1.5 Temperature and Heat 4
- 1.6 Thermodynamics 4
  - 1.6.1 Thermodynamical System 5
- 1.7 Laws of thermodynamics 5
  - 1.7.1 Zeroth law of thermodynamics 5
  - 1.7.2 The First Law of Thermodynamics 6
  - 1.7.3 The Second Law of Thermodynamics 6
  - 1.7.4 The Third Law of Thermodynamics 7
- 1.8 Acoustics 7
  - 1.8.1 Acoustic Energy 8
  - 1.8.2 Types of Acoustics 8
    - 1.8.2.1 Environmental Noise 8
    - 1.8.2.2 Musical Acoustics 8
    - 1.8.2.3 Ultrasounds 9
    - 1.8.2.4 Infrasonds 9
- 1.9 Power 9
- 1.10 Energy 9
  - 1.10.1 Forms of Energy 9
  - 1.10.2 Kinetic Energy and Work 10
- 1.11 Force and Derivatives 10
- 1.12 Newton's Laws of Motion 11
  - 1.12.1 First Law 11
  - 1.12.2 Second Law 11
  - 1.12.3 Third Law 12
- 1.13 Fundamental Forces 12
- 1.14 Mass-Energy Equivalence 12

## **2. BASIC ELECTRONICS**

**14–25**

- 2.1 Electronics 14
- 2.2 Atomic Structure 15
- 2.3 Structure of Elements 16

- 2.4 Electron 16
- 2.5 Electron Energy 17
- 2.6 Valence Electrons 17
- 2.7 Free Electrons 18
- 2.8 Nuclear Forces 19
- 2.9 Shell Model 19
- 2.10 Indication for Shell Model 20
- 2.11 Atomic Number and Mass Numbers 20
- 2.12 Classification of Nuclei 21
- 2.13 Bohr's Atomic Model 21
- 2.14 Energy Levels 22
- 2.15 Energy Bands 23
- 2.16 Energy Bands in Solids 23
- 2.17 Classification of Solids with Energy Bands 24
  - 2.17.1 Conductors 24
  - 2.17.2 Semiconductors 24
  - 2.17.3 Insulators 25

### 3. SEMICONDUCTOR PHYSICS

26–45

- 3.1 Semiconductor 26
- 3.2 Bonding in Semiconductors 26
- 3.3 Energy Band diagram of Semiconductors 27
- 3.4 Effect of Temperature on Semiconductors 27
- 3.5 Contribution of Hole for Conduction of Current 28
- 3.6 Types of Semiconductors 29
  - 3.6.1 Intrinsic Semiconductor 30
  - 3.6.2 Extrinsic Semiconductor 30
    - 3.6.2.1 n-type Semiconductor 31
    - 3.6.2.2 p-type Semiconductor 32
    - 3.6.2.3 Carriers of n-type and p-type Semiconductors 32
- 3.7 p-n Junction 33
- 3.8 Effect of DC Voltage on p-n Junction 34
  - 3.8.1 Forward Biasing of p-n Junction 34
  - 3.8.2 Reverse Biasing of p-n Junction 35
  - 3.8.3 Potential Difference—Electron Flow Characteristics of p-n Junction 35
- 3.9 Semiconductor Diode as Crystal Diode 36
  - 3.9.1 Rectifier Diode 36
  - 3.9.2 Classifications of Rectifiers 37
    - 3.9.2.1 Single-phase Rectifiers 37
    - 3.9.2.2 Polyphase Rectifiers 37
    - 3.9.2.3 Half-wave Rectifiers 38
    - 3.9.2.4 Full-wave Rectifiers 39
      - 3.9.2.4.1 Two Diode or Centre Tapped Rectifier 39
      - 3.9.2.4.2 Bridge Rectifier Circuit 40

- 3.10 Transistors 41
  - 3.10.1 Bipolar Junction Transistor (BJT) 41
  - 3.10.2 Field Effect Transistor (FET) 42
- 3.11 Filter Circuits 44
- 3.12 Oscillators 44

## 4. ELECTRICITY

**46–87**

- 4.1 Electric Charge 46
- 4.2 Charge Density 46
- 4.3 Coulomb's Law 47
- 4.4 Electric Field 48
- 4.5 Electric Potential 48
- 4.6 Electromotive Force 48
- 4.7 Batteries 49
  - 4.7.1 Zinc-carbon Batteries 49
  - 4.7.2 Lead-Acid Battery 50
  - 4.7.3 Alkaline Batteries 52
- 4.8 Thermocouple 54
- 4.9 Electromagnetic Induction 55
- 4.10 Faraday's laws of Electromagnetic Induction 55
  - 4.10.1 Faraday's First Law 56
  - 4.10.2 Faraday's Second Law 56
  - 4.10.3 Induced EMF and Flux Relation 56
- 4.11 Lenz's Law of Electromagnetic Induction 57
- 4.12 Fleming's Left-hand and Right-hand Rule 57
  - 4.12.1 Fleming's Left-Hand Rule 58
  - 4.12.2 Fleming's Right-Hand Rule 58
- 4.13 Self Induction 59
- 4.14 Mutual Induction 60
- 4.15 Eddy Currents 61
- 4.16 Inductors 61
- 4.17 Transformer 61
- 4.18 Types of Transformer 62
  - 4.18.1 Based on Voltage Levels 62
    - 4.18.1.1 Step-down Transformer 62
    - 4.18.1.2 Step-up Transformer 63
  - 4.18.2 Based on the Medium of Core Used 63
  - 4.18.3 Based on the Winding Arrangement 63
  - 4.18.4 Based on Usage and Install Location 65
    - 4.18.4.1 Power Transformer 65
    - 4.18.4.2 Distribution Transformer 65
    - 4.18.4.3 Measurement Transformer 65
    - 4.18.4.4 Protection Transformers 65

- 4.18.5 Based on the Place of Use 65
- 4.18.6 Losses in a Transformer 66
- 4.18.7 Types of Losses in a Transformer 66
  - 4.18.7.1 Iron Losses 66
    - i. Hysteresis Loss 66
    - ii. Eddy Current Loss 66
  - 4.18.7.2 Copper Loss or Ohmic Loss 66
  - 4.18.7.3 Stray Loss 67
  - 4.18.7.4 Directric Loss 67
- 4.19 Capacitors 67
  - 4.19.1 Capacitance of a Capacitor 68
  - 4.19.2 Multi-plate Capacitor 69
  - 4.19.3 Parallel Plate Capacitor 69
  - 4.19.4 Current-Voltage (I–V) Characteristic Curve 70
  - 4.19.5 The Farad 72
  - 4.19.6 Capacitors in Parallel and Series 72
  - 4.19.7 Current and Current Density 73
- 4.20 Ohm's Law 75
  - 4.20.1 Resistance 75
- 4.21 Kirchhoff's Circuit Law 76
- 4.22 Effects of Electric Current 77
  - 4.22.1 Heating Effect: Joule's Law 77
- 4.23 Magnetism 78
- 4.24 Magnetic Induction (B) 78
- 4.25 Magnetisation (M) 79
- 4.26 Magnetic Susceptibility ( $\chi_m$ ) 79
- 4.27 Magnetic Permeability ( $\mu$ ) 79
- 4.28 Magnetic Materials 80
  - 4.28.1 Diamagnetism 80
  - 4.28.2 Para-magnetism 80
  - 4.28.3 Ferromagnetic 81
  - 4.28.4 Antiferromagnetism 81
  - 4.28.5 Ferrimagnetism 82
- 4.29 Magnetic effect of current 82
- 4.30 Magnetic Field Around a Straight Conductor Carrying Current 82
- 4.31 Biot Savart Law 83
- 4.32 Ampere's Circuital Law 83
- 4.33 Solenoid 84
  - 4.33.1 Right-Hand Palm Rule 84
  - 4.33.2 End Rule 84
- 4.34 Galvanometer-Moving Coil Galvanometer 85
- 4.35 Conversion of Galvanometer into an Ammeter 86
- 4.36 Conversion of Galvanometer into a Voltmeter 86
- 4.37 Multimeter 87

**5. HEAT AND THERMODYNAMICS 88–103**

- 5.1 Introduction to Thermodynamics 88
- 5.2 Thermal Equilibrium 88
- 5.3 Law of Thermodynamics 89
  - 5.3.1 Zeroth Law of Thermodynamics 89
    - 5.3.1.1 Heat and Internal Energy 89
  - 5.3.2 First Law of Thermodynamics 89
    - 5.3.2.1 Specific Heat Capacity 90
    - 5.3.2.2 Thermodynamic State Variables and Equation of State 91
    - 5.3.2.3 Thermodynamic Processes 91
    - 5.3.2.4 Heat Engines 92
  - 5.3.3 Second Law of Thermodynamics 93
    - 5.3.3.1 Reversible and Irreversible Processes 94
  - 5.3.4 Third Law of Thermodynamics 94
- 5.4 Thermometry 94
- 5.5 Thermostat 95
- 5.6 Thermocouple 96
  - 5.6.1 Seebeck Effect 97
  - 5.6.2 Peltier Effect 97
  - 5.6.3 Thompson Effect 97
- 5.7 Calorimetry 97
- 5.8 Water bath 99
- 5.9 Incubator 99
- 5.10 Autoclave 100
- 5.11 Refrigerators 102

**6. REVIEW OF PHYSICS—INSTRUMENTATION 104–114**

- 6.1 Physical Balance 104
- 6.2 Chemical Balance 105
- 6.3 Properties of Matter 106
- 6.4 Diffusion 108
  - 6.4.1 Simple Diffusion 108
  - 6.4.2 Facilitated Diffusion 108
- 6.5 Osmosis 109
- 6.6 Centripetal Force and Centrifugal Force 109
- 6.7 Centrifuge 110
- 6.8 pH Meter 113

**7. SOUND 115–119**

- 7.1 Sound and Noise 115
- 7.2 Sound Waves 115

- 7.2.1 Frequency, Wavelength and Wave Speed 116
- 7.2.2 Point Sources 116
- 7.2.3 Sound Power and Intensity 117
- 7.3 Wave Reflection 117
  - 7.3.1 Standing Waves 118
- 7.4 Measures of Sound 118
- 7.5 Decibels 118
- 7.6 Application 118

## 8. OPTICS

120–140

- 8.1 Principles of Lighting 120
- 8.2 The Nature of Light 120
- 8.3 Newton's Corpuscular Theory 121
- 8.4 Huygens's Wave Theory 121
- 8.5 Maxwell's Electromagnetic Theory 122
- 8.6 Photoelectric Effect, Wave Theory of light and Wave-particle Duality 123
- 8.7 Properties of Light 123
- 8.8 Photoelectric Effect 124
- 8.9 Reflection, Refraction, and Dispersion 125
  - 8.9.1 The Law of Reflection 125
  - 8.9.2 The law of Refraction 125
  - 8.9.3 Dispersion 126
- 8.10 Total Internal Reflection and Fiber Optics 127
- 8.11 Optical Fiber 127
- 8.12 Laser 128
- 8.13 Scattering of Light 130
- 8.14 Types of Scattering 130
- 8.15 Lenses 132
  - 8.15.1 Convex or bi-convex Lens 132
  - 8.15.2 Concave or Bi-concave Lens 132
- 8.16 Refraction Through Convex and Concave Lenses 133
- 8.17 Refraction Through a Convex Lens—An image formation 133
- 8.18 Lens Formula 136
- 8.19 Cartesian Sign Convention of Concave and Convex Lens 137
- 8.20 Magnification of a Lens 137
- 8.21 Power of a Lens 137
- 8.22 Lens Aberration 138
- 8.23 Types of Aberration 138
  - 8.23.1 Astigmatism 138
  - 8.23.2 Coma 138
  - 8.23.3 Curvature of Field and Distortion 139
  - 8.23.4 Spherical and Chromatic Aberration 140

## 9. MEDICAL PHYSICS 141–154

- 9.1 Blood Pressure Measurement 141
- 9.2 Sphygmomanometer: Blood Pressure Measurement 142
  - 9.2.1 Direct Method 142
  - 9.2.2 Indirect Method 142
- 9.3 Defibrillators 144
- 9.4 Cathode Ray Oscilloscope 146
  - 9.4.1 Construction of Cathode Ray Oscilloscope 146
- 9.5 Plethysmography 148
  - 9.5.1 Limb Plethysmography 148
  - 9.5.2 Lung Plethysmography 149
    - 9.5.2.1 Understanding of Plethysmography Tests 149
- 9.6 Pulse oximetry 150
  - 9.6.1 Need to Know of Pulse Oximeter 150
- 9.7 Medical Ultrasound and Doppler 152
  - 9.7.1 Uses of Ultrasound Scans 154

## 10. ELECTROCARDIOGRAPHY 155–159

- 10.1 Basic Principle and the Galvanometer Deflection 155
- 10.2 Two Chamber Concepts 155
- 10.3 ECG Special Terms 156
  - 10.3.1 Electrocardiography 156
  - 10.3.2 Electrocardiograph 156
  - 10.3.3 Electrocardiogram (ECG) 156
- 10.4 Terminology of ECG Deflection 156
- 10.5 Activation of Ventricles 156
- 10.6 ECG Leads and its Nomenclature 158

*Bibliography* 160

*Index* 161–164
